

7th grade Math ONLY

March 6, 2020

Pi Day is just around the corner! March 14 or 3/14 (get it...3.14 ☺) is officially Pi day, but we will celebrate on Friday March 13th. To celebrate this glorious day, we are going to have a Pi extravaganza during Math class. I'm asking students to bring in something that is edible and circular. We will spend our class period calculating the radius, diameter, area, and circumference of our circular treats, and then celebrate by consuming them when we are finished. It's basically a mathematical Thanksgiving!

Here are some ideas of what circular items you can bring:

- An actual pie
- Cookies
- Cupcakes
- Pizza
- Oatmeal Crème Pies
- Oreos
- Cake

These are just a few ideas we came up with. Please do not feel obligated to bring enough for the entire class since we will have more than enough food to go around. Bringing something in is NOT a requirement, but highly suggested so that we have enough objects to measure, and to ensure a fun-filled experience for all students.

If you have any questions, please feel free to email us:

Rosalyn Parker rparker@jefcoed.com

Josh Prueett jprueett@jefcoed.com

Connie Clayton connieclayton@jefcoed.com

Thanks for your help, and we can't wait to celebrate Pi Day in Math 7!
